

Ms. Chitra

Where interest lies, there is growth

In 2004 when I was a parent of a KG kid, Vedavalli Vidyalaya gave me an opportunity to join the eight-month long teacher training programme. I wrote the B.Ed. entrance examination in IGNOU within a month and the training helped me to get admission for B.Ed. I was trained in Vedavalli Vidyalaya to handle the KG and Primary Classes for all subjects, Art and craft, Computer, P.E. etc. The educational experts trained me in the subjects and to handle the children as a second Mother by understanding their emotions.

The training built up my confidence to take up any assignment with a positive attitude. It gave me interest to handle all the subjects, especially my favourite subject Mathematics. I started to enjoy teaching Maths through activities. I could give the best to the students because I was given the best during my training.

After completing the training, in 2005 I was appointed to handle Classes from II to IV. The training and learning was a continuous activity for me in the school. I was simultaneously doing my B.Ed and completed it successfully with ease because of the practical experience I gained from Vedavalli Vidyalaya.

Along with teaching I have managed several responsibilities - as a trainer for teacher trainees, in-charge of Examination Department, Talent Exam, Maths Lab, Computer Supplemented Project, ASSET Examination, Deputy Management Representative for ISO. Now I handle Maths for Class XII.

The enabling environment in Vedavalli Vidyalaya made my growth possible as a teacher and as a person.

**There is a saying, "Experience or Practice makes a man perfect"
But I say, VEDAVALLI VIDYALAYA is making me perfect.**
