

**C. Dinesh Kumar, B.E.**  
"Cogito Ergo Sum"  
I think! Therefore I am!

After completing my + 2 in Vedavalli Vidyalaya in 2003, I joined PSG College of Technology to pursue my Bachelors Degree in Mechanical Engineering (Sandwich). During College days, I was part of the team that trained Companies in Sensors and Instrumentation. I was involved in various paper presentations, and have won prizes in symposiums held in Engineering Colleges across India. I was also involved in various Extra Curricular activities. I received the Best Outgoing Student Award.

I was recruited by Ashok Leyland Ltd which was the first Company to visit the campus for recruitment. I have been working in Ashok Leyland since then.

#### **What have I learnt from Vedavalli –**

Courage is the main thing that I learnt in school. The school helped me to face any situation or problem boldly and also to come out of those situations unscathed! I believe that the fear free atmosphere in the school helps students to face tough situations in life! After all, when the going gets tough, only the tough gets going.

The school had one of the best libraries in the neighborhood. The reading habit which was inculcated in the school by allocating a separate hour for library has helped me greatly. Thanks to my school, my reading habit now gives me a relaxed time.

I strongly believe Vedavalli Vidyalaya produces pillars of the society. I profusely thank my school for all it has done to me!
